

Industrial Internship Project Report

Business Analyst Role | Financial Performance Dashboard

1. Project Identification

This report documents the development and analysis of the **Financial Performance Dashboard**, a key requirement for the final-semester Computer Engineering industrial internship [cite: 448].

- **Project Title:** Financial Performance Dashboard [cite: 448]
- **Tools Used:** Tableau Desktop [cite: 448]
- **Domain:** Business Analyst [cite: 448]
- **Difficulty Level:** Intermediate [cite: 448]

2. Data Methodology & Preparation

The primary objective was to analyze financial health across various countries, products, and segments to enable data-driven decision-making [cite: 453, 571].

Calculated Fields Implementation

To provide deeper analytical depth, the following calculations were implemented in Tableau [cite: 477, 616]:

- **Profit Margin:** $SUM(Profit) / SUM(Sales)$ [cite: 480]
- **Cost-to-Sales Ratio:** $SUM(COGS) / SUM(Sales)$ [cite: 489]
- **Discount Impact:** $SUM(Discounts) / SUM(Gross Sales)$ [cite: 563]

3. Financial Performance Summary (2018–2020)

The analyzed Profit and Loss statement demonstrates a period of significant scaling and growth [cite: 790, 795].

Key Metric	2018	2019	2020
Gross Profit	2,383,246	3,968,546	5,341,360
EBITDA	1,147,805	2,007,744	2,237,006
Operating Profit	740,801	1,475,688	1,522,166
Net Profit	623,856	13,03,147	12,89,945

Data Source: Profit and Loss Statement [cite: 790, 792, 797, 800]

4. Dashboard Insights

A. Trend and Segment Analysis

Sales and Profit trends over time, segmented by business units, allow identification of seasonality and growth drivers [cite: 498, 503]. Analysis shows peak sales in certain months or segments [cite: 589, 595].

B. Geographic and Product Performance

The dashboard provides a country-wise sales distribution [cite: 591]. Heat maps were used to understand the impact of discount bands on product sales [cite: 510, 569].

C. Strategy Evaluation

Scatter plots were utilized to visualize the relationship between gross sales and discounts to evaluate the effectiveness of discounting strategies [cite: 504, 570, 672].

5. Strategic Recommendations

Optimize Discounting: Evaluate the effectiveness of discount bands. If volume does not increase proportionally, reduce discount levels to protect Profit Margins [cite: 606, 672].

Cost Control: Monitor products with high COGS-to-Sales ratios to identify cost-heavy regions and products [cite: 489, 597].

Operational Review: Address rising staff and software costs to ensure operational expenses do not outpace net profit growth [cite: 800].
